### South African Abalone 南非鲍鱼

South Africa mainly exports abalone, live, fresh or chilled, prepared or preserved abalone in airtight metal containers and abalone other (dried or frozen), to Hong Kong, China, Taipei – China, Japan, Singapore, Malaysia, Vietnam, South Korea, United Arab Emirates and Australia.

南非主要出口到中国香港，台湾 - 中国，日本，新加坡，马来西亚，越南，韩国，阿联酋和澳大利亚。

Abalone in South Africa (both farmed and wild), is a premium species with superior product characteristics, though it is produced in relatively small quantities. From a branding perspective, the country has the appropriate geography (unpolluted – the Atlantic, Southern and Indian Ocean), which has the only *Haliotis Midiae* or perlemoen species in the world. South African abalone is highly prized in the markets due its flavour, texture, form and size. It is also highly valued by importers because it is a robust animal that travels well and can survive well in the restaurant tanks, which is the preferred style in Hong Kong. South African canned abalone is also highly favoured as no preservatives or bleaches are added to the brine as is done with Australian abalone

南非的鲍鱼（包括养殖和野生），虽然产量相对较少，却是具有卓越产品特性的优质鱼种。从品牌角度来看，该国拥有适当的地理（未受污染 - 大西洋，南部和印度洋），该地区拥有世界上唯一的鲍氏海螯虾。南非鲍鱼由于其风味，质地，形状和大小而在市场上受到高度赞扬。这也是进口商高度重视的，因为它是一种健康的动物，运行良好，可以在餐厅的坦克中生存，这在香港是首选。南非鲍鱼罐头也非常受欢迎，因为没有防腐剂或漂白剂加入到卤水中，就像澳大利亚鲍鱼一样
